MANUFACTURERS & FABRICATORS OF ENGINEERED MATERIAL SOLUTIONS

## CRYO G-10 Advantages

### Cryogenic Thermoset Composite Materials

G-10 Materials have played a critical role in the LNG market for years. For example, turboexpanders for natural gas came onto the market in the 1960s and G-10 properties enabled engineers to significantly improve equipment design and natural gas processing efficiencies. Since then, resins and composite technology have evolved to outperform those original materials. One material advancement is The Gund Company's CRYO G-10, which provides all of the traditional benefits of standard G-10 (such as machinability and cost-effectiveness) along with improved strength at cryogenic temperatures with dimensional stability.

A recent study at The Gund Company has demonstrated that the strength of new CRYO G-10 increases as temperatures decrease in the cryogenic region. Table 1 indicates the strength of CRYO G-10 at continuously lower temperatures.

TABLE 1

|                               |  | ASTM/ISO             | TYPICAL VALUES    |           |
|-------------------------------|--|----------------------|-------------------|-----------|
| PROPERTIES (HPL from B Stage) |  | Test Method          | Units             | CRYO G-10 |
| PHYSICAL                      | Glass Content from LOI                 |                      | %                 | 70.5      |
|                               | Density                                |                      | gm/c.c.           | 2.00      |
| THERMAL                       | CTE: Perpendicular: Room Temperature   | ISO 11359-2          | 10(E-6)/K         | 26.04     |
|                               | CTE: Parallel: -196°C                  | ISO 11359-2          | 10(E-6)/K         | 8.08      |
|                               | Thermal Conductivity: Room Temperature | ASTM C117 / ISO 8302 | W/(m-K)           | 0.235     |
|                               | Thermal Conductivity: -196°C           | ASTM C117 / ISO 8302 | W/(m-K)           | 0.28      |
| MECHANICAL                    | IZOD Impact Strength: Room Temperature | ISO 180              | KJ/m <sup>2</sup> | 139       |
|                               | Charpy Impact Strength: Room Temp      | ISO 179              | KJ/m <sup>2</sup> | 131       |
|                               | Charpy Impact Strength: -196°C         | ISO 179              | KJ/m <sup>2</sup> | 148       |
|                               | Compressive Strength: Room Temperature | ASTM D695            | MPa               | 583       |
|                               | Compressive Strength: -100°C           | ASTM D695            | MPa               | 826       |
|                               | Compressive Strength: -196°C           | ASTM D695            | MPa               | 974       |
|                               | Tensile Strength: Room Temperature     | ISO 527-4            | MPa               | 537       |
|                               | Tensile Strength: 100°C                | ISO 527-4            | MPa               | 708       |
|                               | Tensile Strength: 196°C                | ISO 527-4            | MPa               | 754       |

CRYO G-10

The Gund Company custom fabricates insulation materials to the exact specifications and drawings specified by our customers. We offer our customers the proper product for their specific application. A variety of dimensions and diameter sizes are available. Product colors vary according to material type. Additional data and samples are available on request.

The data supplied are typical values. They are not to be considered specification values. All of the information, suggestions, and recommendations about these properties and uses of the products herein are based on tests and data believed to be accurate; however, the final determination regarding the suitability of any material described herein for the contemplated application, the manner of such use, and whether the use infringes any patents is the sole responsibility of the user. There is no warranty - expressed or implied - including, without limitation, warranties of merchantability or fitness for a particular purpose. Under no circumstances shall we be liable for incidental or consequential loss or damage.

## CRYO G-10 Advantages (cont.)

CRYO G-10 continues to provide the same machinability advantages of traditional G-10 with high performance and superior bond strength in cryogenic conditions.

## IN SUMMARY, CRYO G-10 IS AN ADVANCEMENT IN TECHNOLOGY OVER TRADITIONAL G-10

There are many applications in the LNG industry where CRYO G-10 can be utilized for ultimate performance. G-10 has been used in designs for decades and has withstood the test of time for its thermal & electrical insulation, corrosion resistance, and low moisture absorption. Building on that reliability, CRYO G-10 can enhance those properties for added reliability with the same affordability compared to other exotic thermoplastics and materials such as PEEK.

## OUR EXPERTISE IS YOUR COMPETITIVE ADVANTAGE

The Gund Company provides a wide range of material solutions from rigid, glass epoxy composites to high-temperature, silicone sponges.

We take a consultative approach to understanding your application by working with your engineers and buyers to find materials that fit the application. By understanding the most important material properties, we often find cost-reduction opportunities. Our Application Engineering Teams have decades of material experience and look forward to working with you on your upcoming project.

### Material Families:

- Thermoset Rigid Laminates and Composites
- Flexible Laminates, Papers, Films, and Felts
- Thermoplastic Materials
- Elastomeric Materials

### Our Manufacturing Capabilities Include:

- Compression Molding
- Pultrusion
- Filament & Convoluted Wound Tube
- Infusion & B-Stage Composites Lay-up and Molding
- Injection Molding
- Extrusion of Thermoplastics

### Our Engineering Capabilities Include:

- Custom Material Development
- Resin Formulation
- Laboratory Testing
- Comparative Materials Evaluation
