G-Flex Meta-Aramid Paper YT510

Insulation Aramid Papers

G-Flex YT510 is a group of insulation aramid papers that offer high dielectric strength, mechanical toughness, flexibility, and resilience. It is available in thicknesses ranging from 0.05 mm to 0.75 mm (2 mil to 30 mil). G-Flex YT510 is widely used in a majority of electrical equipment applications. It can be used in almost any electrical product where an electrical insulation sheet form is necessary. G-Flex YT510 exhibits exceptional electrical, mechanical, and thermal properties comparable to all alternatives today. The table below shows the typical data for significant electrical, mechanical, and thermal properties by standard thickness.

The UL File number is E521153.

G-Flex YT510 meets ANSI/NEMA FI 3-2004 - superseding MIL-1-24204A.

The Gund Company custom fabricates insulation materials to the exact specifications and drawings specified by our customers. We offer our customers the proper product for their specific application. A variety of dimensions and diameter sizes are available. Additional thicknesses are available upon request.

G-Flex Meta-Aramid Paper YT510

Insulation Aramid Papers

G-Flex™ is The Gund Company's brand of meta-aramid Paper. The Gund Company has used its broad engineering and application knowledge along with extensive testing and global relationships to bring our customers the G-Flex™ Meta-Aramid Paper.

G-Flex™ Meta-Aramid paper YT510 is manufactured from 100% aramid fibers. It carries a Temperature Index (TI) of 210°C, a VTM-O Flame Rating, and full UL approval (File #: E521153). This paper offers high inherent dielectric strength, mechanical toughness, flexibility, and resilience. Applications for G-Flex™ include stator slot liners, phase insulations, coil wrap, conductor wrap, and other insulation applications for the electrical industry.

G-FLEX™ META-ARAMID PAPER BENEFITS

HEAT RESISTANCE: G-Flex™ Meta-Aramid paper has long-lasting thermal stability. It can be used for many hours at high temperatures while maintaining excellent dimensional stability. It will not embrittle, soften, or melt when exposed temporarily at high temperatures of 300°C.

FLAME RESISTANCE: It is inherently flame resistant. It does not self-burn or melt in the room air, is not combustion-supporting, and has the property of self-extinguishing.

ELECTRICAL INSULATION: Meta-aramid fiber has very good electrical insulation properties. The dielectric strength of the meta-aramid paper is more than 20kV/mm.

CHEMICAL STABILITY: Meta-aramid fiber has a very stable chemical structure.

STRONG RESISTANCE: At room temperature, it is resistant to most strong inorganic acids and alkalis.

UNDERWRITERS LABORATORIES (UL) RECOGNIZED: At 220°C insulation.

SOLD WORLDWIDE: Directly from The Gund Company and readily available in 12 locations.

UL-CERTIFIED PRODUCT: File # E521153

EXCELLENT PROPERTIES: Superior Dielectric Breakdown strength

Additional thicknesses are available upon request.

COMMON APPLICATIONS

- Stator Slot Liners
- Coil Wraps
- Formed Slot liners
- Formed Top Sticks
- Wire Wraps
- Slit into Tape Widths
- Phase Insulation
- Pole Collars
- Laminate Insulation

OUR EXPERTISE IS YOUR COMPETITIVE ADVANTAGE

The Gund Company provides a wide range of material solutions from rigid, glass epoxy composites to high-temperature, silicone sponges.

We take a consultative approach to understanding your application by working with your engineers and buyers to find materials that fit the application. By understanding the most important material properties, we often find cost-reduction opportunities. Our Application Engineering Teams have decades of material experience and look forward to working with you on your upcoming project.

Material Families:

- Thermoset Rigid Laminates and Composites
- Flexible Laminates, Papers, Films, and Felts
- Thermoplastic Materials
- Elastomeric Materials

Our Manufacturing Capabilities Include:

- Compression Molding
- Pultrusion
- Filament & Convoluted Wound Tube
- Infusion & B-Stage Composites Lay-up and Molding
- Injection Molding
- Extrusion of Thermoplastics

Our Engineering Capabilities Include:

- Custom Material Development
- Resin Formulation
- Laboratory Testing
- Comparative Materials Evaluation
